OFFICIAL COLLEGE PROJECT ABSTRACT · PROJECT 19 OF 55

Stock Market price

Domain: IoT & Fintech / Inventory Control | **Module:** project_19_stock_management

OFFICIAL ABSTRACT

This work is aimed at developing a hardware based system named Stock Management System for managing the stock system of any organization. The Stock Management System (SMS) refers to the system and processes to manage the stock of organization with the involvement of Technology system. This system can be used to store the details of the stock, stock maintenance, update the stock based on the sales details, and generate sales and stock report daily or weekly based. This project is categorize individual aspects for the sales and stock management system. In this system we are solving different problem affecting to direct sales management and purchase management. Stock Management System is important to ensure quality control in businesses that handle transactions resolving around consumer goods. Without proper stock control, a large retail store may run out of stock on an important item. A good stock management system will alert the wholesaler when it is time to record. Stock Management System is also on important means of automatically tracking large shipment. An automated Stock Management System helps to minimize the errors while recording the stock.

📌 Project Summary & System Specifications

Project Title	Stock Market price
Specialization / Category	IoT & Fintech / Inventory Control
Target Technology Stack	Python (Flask), PyTorch / TensorFlow / Scikit-Learn, Modern Web UI
Default Backend Port	`:5000`

Local Implementation	`project_19_stock_management`
